Adobe Motion Graphic

Capstone Project

Final Project: Create a Short Promotional Animated Video – 9 Hrs.

Project Overview:

Create a 30-second promotional animated video for a fictional product or service, incorporating essential features from Adobe Illustrator, Adobe After Effects, Adobe Premiere Pro, Adobe Audition, and Adobe Character Animator.

Project Breakdown:

Session 1: Design and Animation

Concept and Design:

- **Adobe Illustrator for Motion:**
  - Design basic vector assets including a logo, product icons, and simple characters.
  - Save these assets in a format compatible with After Effects (e.g., AI files).

2. **Animation Setup:**
   - **Adobe After Effects:**
     - Import the vector assets from Illustrator.
     - Create basic animations for the assets, such as moving text, bouncing icons, or a simple character animation.
     - Apply transitions and effects to enhance the visual appeal of the video.

Session 2: Audio and Final Editing

1. **Audio Editing:**
   - **Adobe Audition:**
     - Record or source a short voiceover or background music.
     - Edit and mix the audio to ensure it complements the animation and maintains good quality.
2. **Editing and Final Touches:**
   - **Adobe Premiere Pro Fundamentals:**
     - Import the animated sequences from After Effects.
     - Assemble the video, add transitions, titles, and ensure a coherent flow.
     - Integrate the audio from Audition and adjust levels as needed.
     - Perform a final review to make sure the video is polished and meets the promotional objective.

Submission Guidelines:

- Submit the final 30-second promotional video.

- Include a brief project description outlining the concept, key design elements, and animation techniques used.
